

"Matrix has a highly professional and innovative approach that gets the best out of a leader and drives innovative results".

Ray Donato
Client Representative, TransLink

You know leadership makes all the difference on project delivery. The most successful projects – both in the eyes of the client and the contractor – are those where the teams have ‘hit the ground running’, with strong vision and leadership from day one. These are the projects where leadership, vision and focus are unwavering throughout the delivery phase of a project.

Hit the Ground Leading is an integrated program of workshops, individual coaching, e-learning and development and a web-based support community. This program applies proven tools and tactics to engage and develop your project leaders.
